PROFESSIONAL PROFILE

Software Developer with strong technical knowledge and a passion for creating efficient and robust solutions. My focus is on developing applications and backend systems, gaining experience in the implementation and maintenance of software infrastructures. I prioritize clean and readable code, applying best development practices. Additionally, I have collaborative skills and the ability to work in multidisciplinary teams, interacting with designers and business analysts, providing a comprehensive view of the software development lifecycle.

SKILLS

Python, JavaScript, MySQL, Nodejs, TypeScript, Express, Django, Git - GitHub, Flask, Docker, Java, Spring, React, C.

EXPERIENCE

Coderise

June 2023 - July 2023

I was part of a professional team for the development of a web application required by coderise, my role was on the BackEnd where I collaborated on the implementation and design of the database and CRUD methods, the function of the web application is to facilitate the recruitment of software developers for companies.

PROJECTS

AirBnB Clone

Apr 2023 - Apr 2023

Holberton, Cali

Project where a clone of the well-known web application AirBnB was developed. For the project, Python, Flask, MySQL, and GitHub were used. I participated in the database structure and project implementation. The project was implemented to be highly scalable, using an ORM (Object-Relational Mapping).

EDUCATION

software development

Sep 2022 - June 2023

Holberton School, Cali

Full-time nine-month training program based on cohorts, project-based learning, peer-to-peer learning, and self-directed learning.
